

# Eduardo Melo

## Goal

As a Junior Software engineer who speaks fluent english in brazil, my career dream is to remotely work for a foreign company or even in person! I strongly believe that my background as a programmer is solid enough to face new challenges out of Brazil!

## Experience

### Front End Developer - Freelance

**Projeto:** [Lorenzato Landing Page](#)

**Código:** [Repositório](#)

Web Application With design and interface designed by me and implemented with Next JS for a company in the automotive sector here in Brazil

### Java / Node / ReactJs Developer

Company: Dolphin Engineer Solutions (Brazilian)

I'm currently responsible for developing a new System made with Node + ReactJS that's going to be used by formans of constructions all across the country to request for material. I am in charge of making improvements on the old company's HR system made in Java and Mysql. This experience gives me the know how of talking to clients and understanding their needs!

### Salesforce Fullstack Developer

I am as well working for a salesforce consultancy as a full stack software Developer responsible for coding business rules with Apex (Java) Language, wich is something like a Java for salesforce only and building UI interfaces with Html, css and Javascript. I have a good knowledge of salesforce flows, validation rules and other features.
