Experience

Front End Developper - Freelance

I work as a freelance developper for small companies that usually need a website or something simple, That's how I started programing

Java / Node / ReactJs Developper

Company: Dolphin Engineer Solutions (Brazilian)

I'm currently responsable for developping a software with Node + ReactJS that's going to be used by formans of constructions all across the country to request for material. I am in charge of making improvements on the old company's HR system made with Java and Mysql. This experience gives me the hability to talk to clients and understanding their needs.

Salesforce Fullstack Developper

I worked for 9 months as a Salesforce Developper using a lot of Apex, Javascript on Lwc's and configuring sales cloud.
